

# Monthly Executive Security Summary

December 2025

## Executive Overview

BlueCyber's Security Operations Center maintained robust protection across all enterprise assets this month. Our team prevented 1,698 potential security incidents while responding to 134 confirmed incidents with a 100% containment rate. Security posture score improved to 87%, reflecting enhanced detection capabilities and faster response times. Vulnerability remediation rate reached 92%, exceeding our 90% target. No material security breaches occurred, and all compliance requirements were met or exceeded.

## Key Performance Indicators

Metric	This Month	Target	Status
Security Posture Score	87%	85%	✓ Exceeds
Incidents Prevented	1,698	1,500	✓ Exceeds
Vulnerability Remediation	92%	90%	✓ Exceeds
Mean Time to Detect	11.8 min	<15 min	✓ Meets
Mean Time to Respond	27.3 min	<30 min	✓ Meets
Compliance Score	95%	95%	✓ Meets

## Security Trends

## Risk Assessment

## Strategic Recommendations

### 1. Endpoint Security Enhancement

Invest in next-generation EDR capabilities to address the 15% increase in endpoint-targeted attacks. Estimated ROI: 3:1 over 12 months through reduced incident response costs.

### 2. Cloud Security Posture Management

Implement automated CSPM tools to maintain visibility as cloud adoption accelerates. Critical for maintaining compliance and reducing cloud-specific risks.

### 3. Security Awareness Training

Expand phishing simulation program to all departments. Current 23% click rate represents significant risk vector that training can reduce by 60-70%.

### 4. Zero Trust Architecture

Begin phased implementation of Zero Trust principles, starting with identity and access management. Aligns with industry best practices and regulatory expectations.
